

GENERAL INFORMATION

Our fabrics are made of technical fibres which need to fulfill highest demands of outdoor use. Water-, dirt- and oil-repellent characteristics are especially important functions of such fabrics.

Despite using only high-quality and proven materials, there are still technical limitations. Particularly, restrictions in using finishing chemicals (due to environmental laws) limit the performance of the textile. In return, such restrictions guarantee their compatibility with humans, animals and the environment as a whole.

For how long a sunprotection fabric stays clean and neat therefore not only depends on the textile's quality, but also on various environmental influences and - above all - how the textile is used and serviced!

Mildew, bacteria and growth of algae are especially annoying. They frequently appear in cases where the fabric is moist and not totally clean. Thereby it is not relevant how old the fabric is - spore contamination may occur soon after first use, after many years in use, or not at all. Relevant are factors like moisture, dirt and heat and if these factors coincide.

For as long as mildew can be killed and the general protective function of the material is maintained, this will not constitute a justified cause of complaint.

DO'S

Mit Wasser und milder Seifenlauge reinigen.
Clean with a mild soapy water solution.
À nettoyer avec de l'eau et de la lessive douce.
Pulire con acqua e poca liscivia di sapone.
Lave con agua y una solución de jabón suave.

Lösen Schmutz regelmäßig entfernen.
Remove loose dirt regularly.
Retirer la saleté régulièrement.
Rimuovere regolarmente lo sporco allentato.
Remueva la suciedad.

DONT'S

Niemals feucht einrollen oder zusammenklappen.
Never roll up or fold whilst wet.
Ne jamais enrrouler ou plier en état mouillé.
Non riavvolgere o chiudere la tenda umida.
Nunca enrolle o doble estando húmedo.

Niemals mit Hochdruckreinigern behandeln.
Never clean the cover with high-pressure cleaners.
Ne jamais nettoyer avec des nettoyeurs haute pression.
In nessun caso trattare con pulitori ad alta pressione.
Nunca limpie la cubierta con agentes de limpieza a presión.
